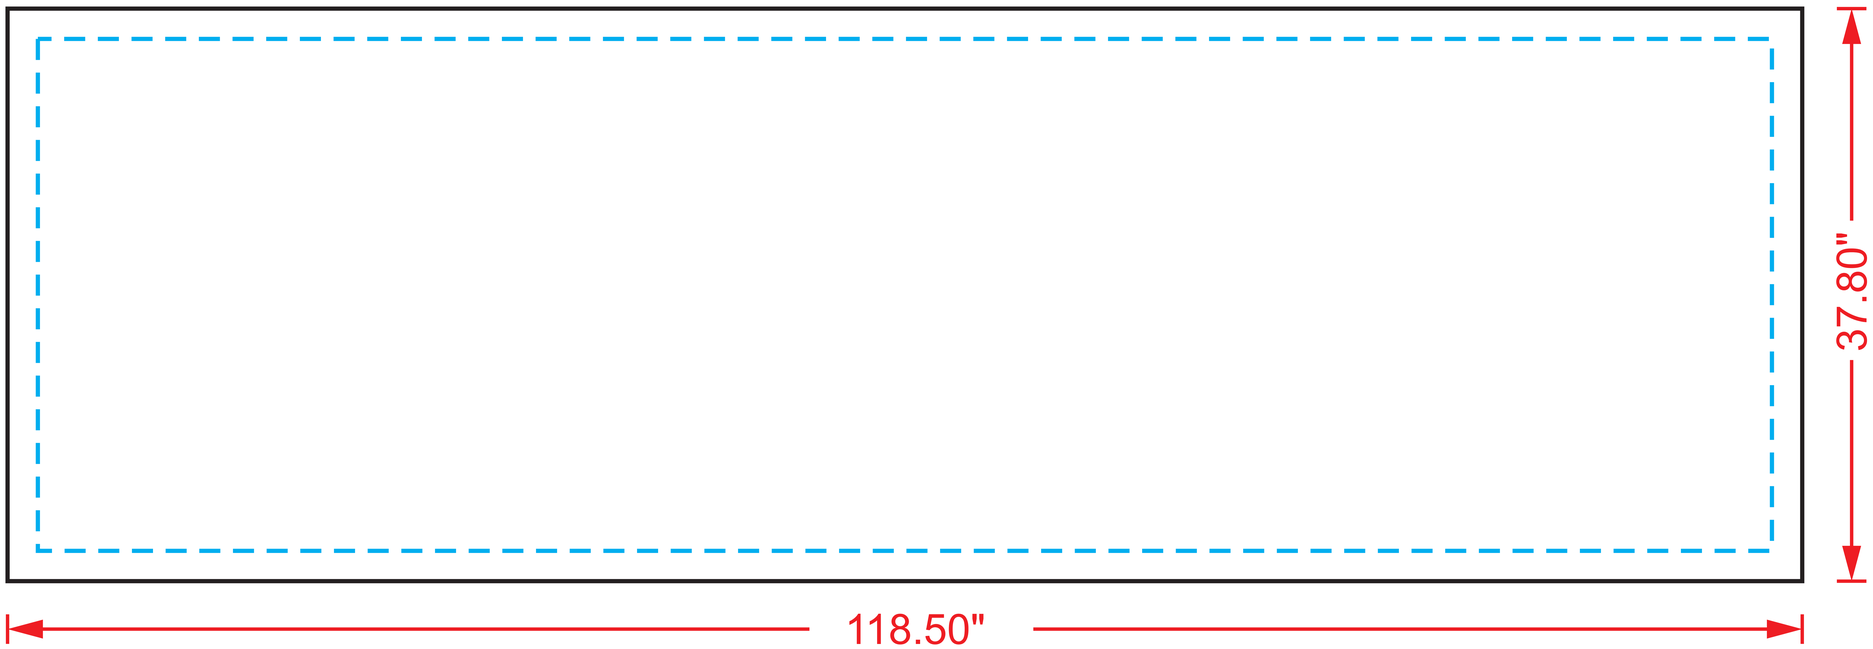
1 X 10FT HALF WALL SIGNLE SIDE TEMPLATE

(If your package have multiple walls then you can repeat the same template for all walls)



- The template is scaled precisely to 50% of actual size. DO NOT resize it or change the template or alter it in any way.
- We accept a minimum resolution of 800DPI for all raster (pixel) images. However, higher resolution images are always better than low-resolution images.
- The CMYK printing process is not always 100% accurate for PANTONE® colors. If you offer us a Pantone® Color Bridge® book, we can provide a process color simulation for you. Further information is available on our site.

Finished Size Line: The BLACK line is the Finished Size Line. (Keep your artwork background till finished line)

Safety Line: The BLUE line shows the Image Safety Line. All text, logos, and important images should be kept within this line at all times. (consider 2" inside from finished size for all sides)
